

## Trainers of the Cyber-MAR Intermediate Level I002 – I003 [b] – I004

### Mr. Pierre Baudry

*Head of software development at DIATEAM*

Pierre BAUDRY is one of the heads of software development at DIATEAM. His main activities are software engineering, delivery, and training on company products. He also handles integration and configuration of software and hardware components, and designs RF communication & analysis solutions using SDR. He holds a Masters degree in Computer Science from ENIB (Brest, France).

---

### Mr. Jesus Villalobos

*Cybersecurity Researcher at ATOS*

Mr. Jesus Villalobos is currently working as Cybersecurity Researcher as part of the Cybersecurity Lab of ATOS Research & Innovation hub. He holds a Master's in Computer Science and Engineering and a Master in Cybersecurity at the University of Seville. He also studied a Computer Forensics course at the University of Granada.

He offers experience as Full-Stack Developer and Project Lead (2012-2017), working in international projects for clients such as Porsche, Volkswagen, Audi, and Niedersächsisches Studieninstitut. He also worked as Cybersecurity Analyst in AndaluCIRT (2017-2018) as part of the Computer Incident Response Team. He made monitoring tasks, malware analysis, pentesting, vulnerability discovery, analysis, and research of hacking techniques used in printers and phishing. During those activities, he used different technologies such as ELK, OSSIM SIEM, Firewalls, Nessus, Acunetix, Lucia, Sandboxing for malware analysis, Kali Linux, etc.

Currently, he is involved in different H2020 projects such as CyberMAR, SOCCRATES, SDN-microSENSE, FINSEC, Anastacia and also collaborating in other H2020 projects like CUREX or CPSoSAAware

### Jarkko Kuusijärvi

*Senior Scientist in the Industrial cybersecurity (VTT)*

Jarkko Kuusijärvi received B.Sc. (Tech.) and M.Sc. (Tech.) degrees from the University of Oulu in 2008 and 2010, respectively. Mr. Kuusijärvi is currently working at VTT Technical Research Centre of Finland Ltd as a Senior Scientist in the

Industrial cybersecurity team. His current areas of research interests include security visualisation/situational awareness and various cybersecurity topics.

**Email:** [Jarkko.Kuusijarvi@vtt.fi](mailto:Jarkko.Kuusijarvi@vtt.fi)

---

### **Sami Noponen**

*Research Scientist (VTT)*

Sami Noponen, MSc, has worked as Research Scientist on VTT's cybersecurity teams since 2007. He has experience on both national and international research projects related to cybersecurity on various topics. He has also done assignments for the Finnish industry, including cybersecurity testing, facility assessments, and hands-on training. The main topics of interest and research topics are cybersecurity testing, ethical hacking, security of industrial automation, and network security.

**Email:** [Sami.Noponen@vtt.fi](mailto:Sami.Noponen@vtt.fi)

---

### **Rory Hopcraft**

*Industrial Researcher at University of Plymouth (UoP)*

Rory Hopcraft is a Researcher at the University of Plymouth working on the European Union's Horizon 2020 Cyber MAR Project, helping to develop various cyber-awareness training materials. His research primarily focuses on the regulatory aspects of maritime cybersecurity. His current focus is on the training and development of digital seafarers.

### **Pablo Giménez Salazar**

*IT project manager at Fundacion Valencia port*

Pablo Giménez received his M.Sc. degree in telecommunication engineering from the Universitat Politecnica de Valencia. He did his final project about nutritional applications in TSB, a research group dedicated to improving health and well-being. Later he became a member of the Distributed Real-Time Systems research group of the Communication Department at the UPV, where he received his Ph.D. He was involved in research projects related to the implementation of SWE to logistics services, industrial safety, and security assurance for smart grids safer.

Since 2015, Pablo Giménez has been working at the Fundacion ValenciaPort as an IT project manager in research projects related to ICT, IoT, Big Data and cybersecurity, in the port, transport, and logistics domain.
